

SIERRA 05/01/12

Aircraft: [SIERRA - ARC](#) ([See full schedule](#))

Flight Number: 65

Payload Configuration: Surprise Valley payload

Nav Data Collected: No

Total Flight Time: 0.92 hours

Comments: A note on flight time tracking. It is customary to track time to the tenths of hours. This flight was 55 minutes which actually rounds up to 1.0 hours. The flight time calculated above is 0.92 which will result in growing discrepancies between SOFRS aircraft time and aircraft logbook time.

Submitted by: Mark Sumich on 05/03/12

Flight Segments:

From:	Crows Landing	To:	Crows Landing
Start:	05/01/12 20:06 Z	Finish:	05/01/12 21:01 Z
Flight Time:	0.92 hours		
Log Number:	12R010	PI:	Jonathan Glen
Funding Source:	Thomas Wagner - NASA - SMD - ESD Cryospheric Science		
Purpose of Flight:	Check		
Comments:	Passes over the metal buildings were performed as low as 250'. A long range flight line was performed out to 5 miles to check the performance of two USGS antennas. The 421.5 MHz aircraft control link failed at first and then appeared to work after reinitializing the GCS modem. The aircraft was climbed to 2500' for a transponder check with Norcal Approach. They could not see a signal from the transponder and replied that 2500' was the floor for reception. The aircraft could not be climbed higher because of COA restrictions. Norcal Approach had gotten a signal from the transponder on the last mission to Crows, so nothing might be wrong with the equipment. The intermittent operation of the 421.5 MHz aircraft control link will result in the transceivers being returned for servicing. This link is 5 W which should provide greater range than the 1 W 900 MHz link. The greater range will be needed in Surprise Valley if Iridium performance is unreliable.		

Flight Hour Summary:

	12R010
Flight Hours Approved in SOFRS	20
Total Used	15.32
Total Remaining	4.68

12R010 Flight Reports
